

In the Specification:

Please replace the original abstract with the following amended abstract:

WITHDRAWAL OF SAMPLES

Abstract of the Disclosure

An arrangement for the withdrawal of samples from a flow of harvested crop flowing in a conveying channel in a harvesting machine includes a guide element mounted so as to cover a sample withdrawal opening provided in a wall of the channel. The guide element is mounted for movement between a first position wherein it blocks the withdrawal opening, and a second position wherein it opens the withdrawal opening and includes a region that is inserted into the conveying channel so as to forcibly deflect a crop sample through the withdrawal opening.
